Eco Friendly Tapes & Labelopes

June 2023

Our unique products are made from plant derived materials.

Eco Friendly Tapes

Pomona eco friendly packaging tapes and labelopes are an environmentally friendly alternative to traditional plastic packaging tapes. Their natural rubber adhesives give them excellent adhesion to a wide range of cardboards.

Our unique products are made from plant derived materials. They are coated with a natural based rubber adhesive system which provides extra initial high tack, and bonding to most cardboard grades. The cellulose film and rubber adhesives are also naturally biodegradable.

Our water activated kraft paper tapes are 100% recyclable, tamper evident and have strong adhesives which bond to the fibre of the carton.

Our natural cellulose packaging tapes and lope on a roll have high tack natural rubber adhesive combined with 100% plant based cellulose film backing which sticks well to rough or smooth surfaces. They are up to 3 times more environmentally friendly than standard acrylic OPP tapes derived from oil.
